Allowable Subject Matter

1. Claims 1, 8, 11, 15, 19, 23, 27, 29 are allowed.
 2. The following is a statement of reasons for indication of allowable subject matter. The prior art fails to teach, or suggest, the limitations of:
" an account database for maintaining account records with points, including credit points, that are redeemable and represent payment units for covering bid prices, a first account record of which being associated with a first bidder and a second account record of which being associated with a second bidder, wherein the credit points are not owned by but made available to any bidder who is qualified, wherein the credit points comprise attention points adapted for bids for an auction which are issued by a merchant for viewing an advertising of the merchant, and wherein for each group of one or more points there is an expiration date at which unredeemed points from such group are eliminated;"
- (as recited in independent Claims 1, 8, 11, 15, 19, 23, 27, 29);

Fisher et al (US Patent No: 5, 835,896) discloses Bidding by mail or facsimile suffers a significant disadvantage as compared to bidding in person or by telephone because the mailing or faxing bidder has no opportunity to increase a bid in quick response to competitive bids received from the floor or by telephone. Neither this Patent , alone nor in combination with others, disclose nor teach the feature of "an account database for maintaining account records with points, including credit points, that are redeemable and represent payment units for covering bid prices, a first account record of which being associated with a first bidder and a second account record of which being associated with a second bidder, wherein the credit points are not owned by but made available to any bidder who is qualified, wherein the credit points comprise attention points adapted for bids for an auction which are issued by a merchant for viewing an advertising of the merchant, and wherein for each group of one or more points there is an expiration date at which unredeemed points from such group are eliminated".

Brett (US Patent : 6, 704,713) discloses given the furious pace of sales for many premium tickets, there exists the unique and as yet, unmet challenge of providing instant, automatic, comprehensive feedback for status of a relatively complex arrangement of standing bids. Neither this publication alone or in combination with others, disclose nor teach the feature of "an account

database for maintaining account records with points, including credit points, that are redeemable and represent payment units for covering bid prices, a first account record of which being associated with a first bidder and a second account record of which being associated with a second bidder, wherein the credit points are not owned by but made available to any bidder who is qualified, wherein the credit points comprise attention points adapted for bids for an auction which are issued by a merchant for viewing an advertising of the merchant, and wherein for each group of one or more points there is an expiration date at which unredeemed points from such group are eliminated”.
